ACADEMIC QUALIFICATION

08/2021 - 06/2026 **Southern University of Science and Technology**

Bachelor of Engineering in Industrial Design

08/2026 - 06/2027 **The Hong Kong Polytechnic University**

Master of Design in Intelligent System Design

- **Awards:** Freshmen Scholarship, Outstanding Student Scholarship, Academic Development Scholarship

PUBLICATION

- Wang, K., Qi, R., **Ge, Y.**, An, P., & Li, X. (2025). *RainbowForest: A Playful Educational Tool to Engage Children with ASD in Learning through Play in Classrooms*. CHI EA’ 25: Extended Abstracts of the CHI Conference on Human Factors in Computing Systems, Article 741, 1–5. ACM. <https://doi.org/10.1145/3706599.3721166>
- Yili, W., **Ge, Y.**, Xin, T., & Liang, H. (2026). *PuffFab: Making Shape Transformable Rice Paper for Playful Food Fabrication*. In Proceedings of the Twentieth International Conference on Tangible, Embedded, and Embodied Interaction (TEI '26). Association for Computing Machinery, New York, NY, USA, Article 66, 1–6. <https://doi.org/10.1145/3731459.3779326>

RESEARCH PROJECTS

06/2025 - 09/2025	Transformable Rice-Paper Food 3D Printing Research <i>Research Assistant</i>
• Supervisor: Prof. Xin Tong (HKUST(GZ)) & Prof. Liang He (University of Texas at Dallas).	

- Modified 3D printer nozzles and developed a user interface that enabled customizable shapes and colors for edible rice-paper printing; designed three interactive modes (cutting, moistening, and printing) to support personalized food design. Outcome: Work in progress accepted by TEI 2026; conducted interaction design experiments on edible 3D printing and developed novel interface methods.	
05/2024 - present	Interactive Learning Tool for Color Recognition in Children with Autism <i>Research Assistant</i>
Supervisor: Prof. Xueliang Li.(SUSTech) - Optimized the first-generation prototype and facilitated a 5-day classroom study in a local special education school in Shenzhen; conducted classroom observations and video recordings; completed 10 teacher interviews to collect professional feedback; coded and analyzed observation and interview data to identify children’ s attention and interaction patterns. Outcome: Contributed to the second-generation prototype iteration by adding a light-feedback mechanism; prototype selected for exhibition at Shenzhen Expo; one paper published at CHI 2025 Interactivity; one paper under review of CHI 2026 Full Paper.	
10/2023 - 04/2024	Human–Robot Interaction in Psychological Counseling Scenarios <i>Research Assistant</i>
Supervisor: Prof. Xueliang Li.(SUSTech) - Participated in the full research process from idea generation to prototype development; built an interactive Arduino-based prototype with touch–vibration feedback; conducted dual interviews with counselors and students and performed qualitative coding on the collected data. Outcomes: Identified the value of non-verbal interactions in building trust and guided prototype iteration; gained experience in ethnographic research, semi-structured interviews, and qualitative coding; one paper under review of THRI journal.	

WORK EXPERIENCES

06/2024 - 09/2024	Creality Co., Ltd., Shenzhen, China <i>Product Planning Intern</i>
- Conducted user research and competitive analysis; drafted requirement documents and produced 100+ pages of reports; created user journey maps and functional architectures, and participated in UI/interaction design iterations. - Developed proficiency in product requirement analysis and standardized interaction documentation; enhanced teamwork and communication with developers and designers.	
03/2024 - 06/2024	Lean In Shenzhen, Shenzhen, China

	<i>New Media Design Intern</i>
	- Assisted in planning annual events, including online webinars and offline workshops; designed visual materials for exhibitions and promotions, such as posters, brochures, and videos. - Strengthened cross-department collaboration and visual communication design abilities; gained comprehensive insight into the planning and execution of large-scale events.
04/2023 - 06/2023	Tencent Computer System Co., Ltd., Shenzhen, China <i>Corporate Intern</i>
	Participated in Tencent CDC User Research & Experience Design Center for the Shenzhen Mangrove Project; conducted user research and field visits, collaborated on interviews, data collection, producing a 30+ page research report with interaction optimization proposals.

HONORS & AWARDS

12/2024	Third Prize (National-level), 16th UXD Award - User Experience Professionals Association
12/2023	Special Excellence Award (Provincial-level), DiD International Industrial Design Award - International Industrial Design Competition Committee
12/2023	Bronze Award (National-level), The 7th Environmental Protection Art Creation Competition - American Culture & Art Exchange Association
11/2023	Silver Award (Provincial-level), 5th Hong Kong Contemporary Design Awards - Hong Kong Association of Art Design And Research
10/2023	Bronze Award (National-level), 2023 British Ecology Design Award - British Ecological Design Association

SKILLS

Software: Keyshot; Figma; P5.js; Processing; Rhino; Blender; Arduino ADE

Language: English; Mandarin
